The smallest AutoCAD running software application in the Autodesk portfolio is AutoCAD Basic, which is part of the AutoCAD suite of applications and is ideal for beginners. As of 2017, it has more than five million users. The suite includes AutoCAD LT, AutoCAD Classic, AutoCAD Web Edition, AutoCAD R19 and AutoCAD Electrical. Read also: Best Casio G-shock Watch Features: AutoCAD for Windows and AutoCAD LT Read also: Best Gaming Computer (Cyberpower CPX340) AutoCAD lets you create free-form drawings and draw mechanical, architectural, architectural, and electrical systems. It also has a wide range of vector drawing tools. You can add and edit layers and use text, dimension, and dimension line styles. There are a number of built-in drawing templates, most of which can be adapted for use with different projects. You can save to file formats such as DWG (AutoCAD native), PDF, JPG, TIFF, CIR, CGM, and CDR. You can also export to PowerPoint, Photoshop, and 3ds Max. In addition, AutoCAD can read other drawings and files, making it easy to share the file with others. There are various tutorial and training videos available on YouTube. Key features: AutoCAD LT Read also: Best Laptop for Coding AutoCAD LT (or AutoCAD, as it's known to the majority of users) is a desktop-based version of AutoCAD, which allows you to create and modify geometric shapes and text. You can import objects from other drawings. The drawing window is divided into three layers. The background is the default layer, which is shown in blue; the design layer, which shows the graphics objects; and the design composition, which is your design work. You can use layer styles to change the overall appearance of your design. All of the objects in a layer have a default linetype. They also inherit the linetype from their parent layer. You can edit or change the linetype for objects on a layer. You can select objects and add or subtract objects to or from the drawing. To remove objects, click the 'delete' icon in the toolbars. The drawing window has a basic drawing workspace, such as grids,

Minister and government ministers are appointed by the leader of the party or coalition that controls the majority of seats in the National Parliament. The judiciary is independent. The Constitution is the supreme law of Papua New Guinea and the supreme law of the country is the Bill of Rights. The dominant political party is the People's National Congress, which was founded in 1963 and has held power since the introduction of multi-party democracy in 1978. The party won 65 of the 83 seats in the National Parliament in the 1999 election. The Constitution provides for equal rights for women, and the Parliament and government generally respect this provision in practice. The legal position of women in Papua New Guinea is complex, and while the law states that women are equal to men, the reality for many women is that they are still denied some basic rights and discriminated against by society. The majority of women in Papua New Guinea are employed as domestic workers and as

I am trying to setup a websocket server in node.js that can send messages to a client and also respond to pings from the client. I have the client part working properly, however I can't figure out the right way to respond to pings. The websocket server below is what I have right now. Any help would be great. var http = require('http'); var server = http.createServer(app); var io = require('socket.io').listen(server); server.listen(80); io.sockets.on('connection', function (socket) { socket.on('ping', function(data) { console.log('ping received:'+ data.type); }); }); A: What you need to do is to add the 'ping' event to the server instance. Then when a client is pinged, the server will send back a message saying so. var http = require('http'); var server = http.createServer(app); var io = require('socket.io').listen(server); server.listen(80); server.on('ping', function(data) { io.sockets.emit('ping', { type: 'pong' }); }); io.sockets.on('connection', function (socket) { socket.on('ping', function(data) {
