Are you searching for a freeware to protect your valuable data from unauthorised access by software or computer virus attack? Never use unprotected data on your computer again because security has never been so easy. BackRex Free DataGuard is an easy-to-use, freeware application that enables the user to protect his valuable documents, important data, financial data and many other elements of his important files from unauthorized access, accidental deletion, and computer

virus attack. This is a must-have tool for every user with valuable data stored on his computer. The innovative User Control Panel allows easy and comfortable management of the program and the archive storage. Backup operation is automatically started after a virus detected and then periodically during working time. Advanced features such as automatic archive file naming according to local or network restrictions, scanner of archive files for virus,... result in the possibility to protect your most important data from harmful actions. You can use its powerful scanning function to scan the whole

archives or selected parts of them. Undelete a files according to your requirements; review all changes made to archives; rearrange archive files; exclude multiple files or folders from your protection. You can easily choose the security level for each archive and restore, change the password of the archive and protect archive from unauthorised access. All these features combined with its easy-to-use User Control Panel give you all the flexibility and control over your precious data. The Visual Basic interface of Free DataGuard is easy to use. It's clearly laid out and very intuitive. Stop the expensive and

time-consuming activity of Recovering applications that are not available anymore. This free application will help you to search for and recover your data from any hard-disk partitions including Master Boot Record and FAT, NTFS and exFAT volumes. This tool can also help to search and recover data from your documents, PDFs, multimedia files, emails, pictures, software and archives. Just specify the type of data you want to recover and a search button will launch a query to identify all media files that match the specified criteria. Every file will be presented in a friendly way with all its path

and information. It will be possible to open and open selected files and even to preview them in other applications. Suppose you are a student who needs to prepare some presentations for your teachers. But you just can't find any good tutorial in your local library. You are frustrated and wonder whether you should spend some time and start learning how to make presentations

Dignitas – The Hunt Dignitas – The Hunt is a StarCraft II multiplayer map built by Team Dignitas. The map was created with the intention of helping new players find a competitive map they're comfortable with, and eventually transition into playing in tournaments. The map itself is a 2v2 map where the two teams have to defend a nuke spawn while trying to find a way to destroy the other's defenses. The first team to destroy the enemy team's defenses wins. If one team
