IP Cat Crack + Free Download

IP Cat is a small software program developed for helping you find out your IP address using a set of straightforward actions. The utility can be deployed on all Windows version out there. Portable running mode You can keep IP Cat stored on USB flash drives or other portable devices so you can carry it with you all the time. Plus, you can run it without administrative privileges. You do not need to follow the steps included in an installation process because a double-click on the executable file is enough for gaining access to the tool's interface. You may take advantage of the fact that it does not leave any entries in your Windows registry and write other configuration files so you can remove it via a quick deletion task. Clean looks IP Cat offers support for a multi-tabbed layout for helping you quickly access its main features. Help instructions are not comprised in the portable package, but you can get an idea about the program works in a short amount of time, thanks to its intuitive set of options. Retrieve your IP address As soon as you run it, the application automatically reveals your current IP address directly in the main window. You may also get additional information about your IP address via your default web browser, more specifically details about the remote port, connection type, browser type, as well as country. What's more, you are given the possibility to set up proxy parameters for your Internet Explorer web browser, check out a useful list with IP commands that can be written in the command-line console, as well as view several explanations about the functions and significance of several concepts (e.g. IP address, domain name, dynamic IP address, static IP address). Tests have pointed out that IP Cat executes tasks quickly and without errors. It is not a resource hog so you do not need a powerful computer in order to run it. What's new in this version: Added support for accessing your web sessions Improved Proxy Commands Tests have pointed out that IP Cat executes tasks quickly and without errors. It is not a resource hog so you do not need a powerful computer in order to run it. We use cookies to ensure that we give you the best experience on our website.
