Please email support@xreview.com for further details. Analog X seems to be the second program of a developer with the same name. A reading tool just designed to display PPM, and HPM values in real time. However, this is not a complete analog dongle, it has only been made as an alternative to Analog X. Buttons need to be pressed in order to get values for PPM and HPM, which can then be displayed in real time within a small square window. The source code for XPreview is not available, even though it's not considered a freebie application. The setup comes with no serial key, and the installer is a self-extracting archive, which means there is no key inside. The only way to get all features, is by purchasing the program.
