FreeDoubleBassTuner Crack + Download [Latest] 2022

Software to calibrate your double bass using E1, A1, D2 and G2 chords in repetition mode. The chords are rendered by touching the corresponding string without applying pressure points on the fretboard. When playing the double bass in a musical group, with several other instruments, it is important that the sound of your bass blends in perfectly with the others. This is why the software allows you to calibrate your double bass according to multiple frequencies, corresponding to different pitches. The pitches are suggestively named: Baroque, France1859, Scientific, New Philharmonic, Concert, Boston Symphony Orchestra, New Berliner Philharmonic, Old Philharmonic or Renaissance pitch. Each of these modes are set to a different frequency level, ranging from 415 Hz (the Baroque pitch) to 460 Hz (Renaissance pitch). The default frequency corresponds to the concert pitch, at 440 Hz. Selecting either pitch allows you to fine tune the sound produced by your double bass. Simply enable the Repeat option, then select either of the chords and the software can play a flowing sound. There is no need to stop tuning to hear each of the chords and the software will be able to loop indefinitely. Alternatively, you can choose the Concert pitch, as a unique chord and then repeat the same chord to calibrate your double bass. Once you have chosen the chords for a double bass string, the software will render the sound in various pitches, as well as in time, repeating them. The software is also capable of generating a loop, which will render the selected chord in a non-stop manner. Once you have calibrated your double bass, the software will render the E1, A1, D2 and G2 chords and you will be able to tune your double bass to these chords in a very short time. Moreover, the software is capable of rendering the authentic double bass E1, A1, D2 and G2 chords, that are the ideal chords for tuning the double bass. The chords are rendered by touching the corresponding string without applying pressure points on the fretboard. This is how the original double bass E1, A1, D2 and G2 chords sound. You can choose the pitch (440 Hz, from Concert pitch) or the duration (3, 5 or 10 seconds). You can also generate the strings sounds in the Baroque, France1859, Scientific, New Philharmonic, Concert, Boston Symphony Orchestra, New Berliner Philharmonic, Old Philharmonic

FreeDoubleBassTuner [2022-Latest]

- Compatibility: Windows® XP/Vista/7/8/8.1/10 - Type: DLL add-in - Description: The DLL allows you to use the keyboard to play the string notes of your double bass or any other musical instrument which has string notes. FreeDoubleBassTuner

Double Bass Tuner FREE Edition is a calibration application designed for the music industry. It allows you to calibrate the sound of your musical instrument, in a very short time. FreeDoubleBassTuner offers you the possibility to play the sounds produced by the musical instrument in question in its natural pitch, and to adjust the musical instrument according to different pitches. The program offers a multitude of tuning solutions, including Baroque, French, Scientific, New Philharmonic, Concert, Boston Symphony Orchestra, New Berliner Philharmonic, Old Philharmonic, and Renaissance. This way, you can easily find the tuning mode that best suits your needs, and fine tune your musical instrument accordingly. Also, it is possible to play the tones of a double bass in a single mode or repetition mode, to make the sound of your instrument more familiar. The program allows you to repeat the chords, one or more times, by enabling the Repeat function. Tonal calibration Using the Repeated function, it is possible to hear the triplets of the major tonality, in their own sound. Simply click on the drum or the tone of the chosen tonality, and FreeDoubleBassTuner will repeat it as many times as you wish, the more times the better. Playing the B-flat tonality FreeDoubleBassTuner offers you a chord for B-flat, which you can play in repetition mode. The sound of the chord is that of a standard triplet. You can have a familiar contact with it, in order to better fine tune your double bass. Calibration of the double bass The calibration process of FreeDoubleBassTuner is simple. You have to touch the strings of your double bass, in the exact positions indicated by the displayed guide. The chords are played, one after the other, by tapping the key button on the keyboard. As soon as you hear the B-flat tone, repeat it as many times as you wish, by pressing the Repeat button. The software enables you to calibrate the double bass according to one or more tones, by pressing the indicated button. You can calibrate the instrument according to the traditional 3-octave scale, and play the scale as many times as you wish, by pressing the Repeat button. Sophisticated double bass tuner FreeDoubleBassTuner enables you to view the strings of your musical instrument, and to play all of them in a rapid manner. While doing this, it

What's New In FreeDoubleBassTuner?

FreeDoubleBassTuner is a reliable software designed to help you calibrate the sound rendered by your musical instrument. The software is capable of playing notes produced with the genuine double bass, in repetition mode, so you can get accustomed with the correct sound, then tune your instrument in a short time. Original double bass chords FreeDoubleBassTuner offers you the possibility to listen to the sounds produced by a calibrated double bass, in their natural pitch. The chords corresponding to each string are E1, A1, D2 and G2, all from the major tonality. The chords are rendered by touching the corresponding string without applying pressure points on the fretboard. The Repeat function is designed to make the software play the selected chord continuously, in order to guide you in obtaining the correct sound from your instrument. Simply enable the Repeat option, then select either of the chords and the software can play a flowing sound. Concert pitches When playing the double bass in a musical group, with several other instruments, it is important that the sound of your bass blends in perfectly with the others. This is why the software allows you to calibrate your double bass according to multiple frequencies, corresponding to different pitches. The pitches are suggestively named: Baroque, France1859, Scientific, New Philharmonic, Concert, Boston Symphony Orchestra, New Berliner Philharmonic, Old Philharmonic or Renaissance pitch. Each of these modes are set to a different frequency level, ranging from 415 Hz (the Baroque pitch) to 460 Hz (Renaissance pitch). The default frequency corresponds to the concert pitch, at 440 Hz. Selecting either pitch allows you to fine tune the sound produced by your double bass. Easily calibrate your musical instrument Just like any instrument with strings, a double bass requires periodical calibration, due to usage. Thus, FreeDoubleBassTuner offers you the means to quickly and correctly tune your musical instrument, according to your requirements. The software can render the genuine double bass chords sounds, in several different pitches, as well as a dedicated function for repeatedly playing the sounds.
