Real-time dimensions: Integrate dimensions from real-world measurements taken with real-world tools. See the embedded measurement tool in 2D drawing views. New dashboards, new tools: In the 2020.2 release, we introduced a new user experience that makes it easier to find and use AutoCAD features. With this new design, you can access views and the command bar faster and use them more efficiently. To further enhance your experience, we continue to innovate to add new features, tools, and dashboards that are better designed and built for you. The 2019.2 release introduced a new profile system that provides customizable settings for different user groups (including keystrokes, toolbar buttons, and displays). We continue to improve our keyboard and control-panel options. A new design for dimensioning: Now, you can set up the precise settings for dimensioning controls in the user profile. A convenient command allows you to preview the settings you've just selected. New standard features for multi-user drawing sessions: In addition to adding more control of how profiles work, we've also improved AutoCAD's multi-user drawing experience by giving you more control over the level of changes. Interactive Geometry: Use an interactive view of geometry in your drawing by making changes to the geometry and having the changes appear on the screen. Try drawing lines and circles in an interactive view and moving them using the mouse to interact with your drawing. (video: 1:20 min.) AutoLISP: Use AutoLISP to automate drawing tasks that otherwise would have to be done manually. For example, you can draw cylinders using only a mouse click. (video: 1:17 min.) Improved collaboration with the 2019.2 release: The 2019.2 release of AutoCAD adds support for more collaboration features, including: Exchangeable objects. Exchangeable objects make it easier for users to work on a drawing from different computers without having to re-export drawings to the local file system. Exchangeable formats. AutoCAD Exchange now supports the Z-Carve format (the AutoCAD format used for carves), making it easier to share designs. Multi-monitor support. Use two monitors for a completely integrated desktop experience. More to come: We continue
