Simple and free to use, the Twitter Client 'Twittalert' is one of the few social networking Twitter applications that are also Desktop applications. Twitter has gained tremendous popularity in recent years, and to keep up with that popularity, it is no wonder that a lot of Twitter clients have been developed. One of them is TweetRank which provides the best of Twitter features. TweetRank not only offers a list of trending topics but also provides the best available Twitter tools. TweetRank is a desktop application that makes it easier for you to keep track of your Tweets and it is a free program that you can download from here. What is TweetRank? TweetRank is a Twitter client that allows you to do everything you want to do on Twitter. You can search for users, link your email to your Twitter account, create lists, post photos and videos, view your friends' Tweets and activity, and a lot more. TweetRank comes with a powerful web client to handle those activities. To get started, simply click on the 'Home' icon at the bottom right of the application. This will bring up the application's options. From here, you can select your language and display type. You can also switch from a list-based interface to a timeline-based one. There are some other options available, but that is all I will mention. There are two modes that you can use, the 'Fullscreen' and the 'Web'. The 'Fullscreen' mode is recommended for when you are using TweetRank for longer periods of time, as you will be able to do more with it. TweetRank web client The web client offers the same basic features as the desktop application. You can search for users, link your email to your Twitter account, create lists, post photos and videos, view your friends' Tweets and activity, and a lot more. You can also comment on and reply to others' tweets, favorite and unfavorite Tweets, follow users and groups, or create a list of users you would like to follow. This program is for using Twitter as a browser for your google account. It is much like what you would get if you went to gmail and logged in with your gmail account, but instead you are using your google account. I use it to post to twitter using my google account so people will see the tweets when they use google search. I have also downloaded a copy of twittail and tried to set it up, but it is extremely difficult to use. Very nice for a person who is in a hurry. Sometimes when you are accessing twitter to use the search facility.
